

Non-Surgical

HIFU High Intensity Focused Ultrasound (Non-Surgical Face Lifting)

40-75 minutes

Non-invasive treatment that uses focused ultrasound energy to stimulate collagen production deep within the skin. It lifts, tightens, and firms targeted areas —without surgery or downtime. Ideal for natural-looking anti-aging results.

**Recommended 1-3x per year
(Varies per individual's skin condition)**

Includes: Medical LED light post procedure &
Professional Grade Ultimate Gel Mask
